

LES DAUPHINS

CÔTES DU RHÔNE ROSÉ

The High Environmental Value certification confirms that the vineyard: promotes biodiversity, reduces quantity and frequency of the treatments use, maintains plant cover on uncultivated areas and preserves water resources.

CLIMATE AND SOIL

The vineyard is located in the South-East of France, around the village of Tulette, in the old historic region of Dauphiné.

There are two different soil types in southern Côtes du Rhône: clay limestone soil formed of sedimentary rock and pebbles and stony soil with a sandy sub-soil.

VINEYARD AND VINIFICATION

The quality of our wines lies in the careful attention given to each stage of the winemaking process. The grapes are grown in carefully selected plots and picked at dawn in order to preserve pale colour, crunchy aromas and freshness. They immediately undergo a gentle pressing. Some of the fine lees are kept bringing roundness and finesse.

TASTING NOTES

The bright, rose-petal color of this rosé suggests a subtle floral aromatic expression. In tasting, we discover refreshing notes of citrus fruits, summer fruits and a lingering finish.

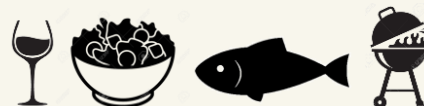

GRAPE VARIETIES

 85% Grenache
10% Syrah
5% Cinsault

SERVICE

 10-12 °C

FOOD PAIRINGS
